

Project Overview

EMWIS is a strategic tool for exchanging information and knowledge, this tool is essential for implementing the action plan approved during the Turin conference in 1999. Accordingly; it is expected that EMWIS to be considered as a system to connect the stockholders with a WEB system to sharing water data and information.

Since PWA is an active Member that representing Palestine in the project since 1995 (Barcelona meeting), it has the pleasure to invite you to participate in the “**First Seminar to Disseminate EMWIS**” and progress made with regard.
